Hello Nick, Chris and Matt

Please let me know if you are interested in investigating the option of having NZ Localities data published on the LINZ Data Service on behalf of Fire and Emergency NZ.

In a similar situation earlier this year, I was able to negotiate LINZ publishing the Emergency Management Basemap on data.govt.nz on behalf of Critchlow / NationalMap. This was agreed after recognising the importance of this freely available dataset to the emergency management community <https://catalogue.data.govt.nz/dataset/emergency-management-basemap>

I would be happy to investigate the option of publishing NZ Localities on the LINZ Data Service and as an Esri REST service, to ensure the data is available both as a web service and to download if this was considered a useful solution for Fire and Emergency NZ. This would make the most of the existing LINZ Data Service infrastructure to publish data, and minimise the work and risk to Fire and Emergency NZ, where publishing data is not currently part of your business as usual operations.

More than happy to discuss further.

Thanks, Susan
