

International Full Fee Students (and equivalent fulltime students) from China 2010-2020

Data extracted from the AUT Data Warehouse as at 25.01.2021 by Modelling and Projections Analyst (checked by Senior Analyst Business Analytics). Please note: the undergraduate and postgraduate headcount numbers do not add to the total, due to some individuals studying at both levels. Including only confirmed (PWN) enrolments, used in official reports.

Dollars are a good estimate, as average dollars per EFTS (by level) have been used for a small number of programmes historically.
