Dear Thomas

Request for Information – Our Reference: IR-01-21-11138

Thank you for your request for information dated 4 April 2021 requesting information about incidents of officer safety. Specifically, you requested:

I am writing to request information on all times an Office [sic] has made a 10/10 radio call, an OSA alarm has been activated (including the duress radio functions on the digital radio networks), or a 1E job was created in CARD.

Please include information between 1 May 2018, and 4 April 2021.

Please supply the requested information in a spreadsheet containing columns for the below data:

- Date and time of the event*
- CARD event number*
- District*
- Area*
- Type e.g. 1E, 10/10 radio call, OSA activation*
- Result Code*

Your request has been considered in accordance with the Official Information Act 1982 (OIA).

I have included a spreadsheet containing records of the 10/10 activations that were logged from an Officer Safety Alarm (OSA), through the *Mobile Responder* application on an officer's mobile, or from an officer's digital radio.

Please note the following about this data:

While the primary purpose of a safety alarm is officer safety, not all these activations indicate that an officer was in immediate danger nor necessarily in need of immediate assistance. The OSA technology can also be very helpful in other situations, for example obtaining the precise location of a vehicle crash for a rescue helicopter or providing 'real-time' Police dog tracking. It is not possible to identify these instances without reading each individual event.

Police National Headquarters

180 Molesworth Street, Thorndon, Wellington SX11149
Telephone: (04) 474 9499. www.police.govt.nz

Regular testing is carried out to ensure all officer safety systems are operating as expected. It is not possible to identify which activations nor how many are the result of testing.

Activations from a digital radio do not generate 1E CARD events nor are they linked to existing CARD events. They instead appear as alerts on the dispatcher's screen and will show for multiple dispatchers when the unit activating it appears in more than one dispatch boundary. This means that event number information is not available, and one activation may generate multiple alerts within the system, resulting in duplicate information in the spreadsheet.

Because there is no linked CARD event and dispatch boundaries do not align with Area boundaries, the Area information you request is not available for digital radio activations.

The result code is determined based on how the dispatcher has managed that CARD event. In some cases, the 1E event may be merged into another event to which it relates (indicated by 'DUPNCAN') or another event may be merged into it or it may be resulted independently, in which case any of the other result codes may be used.

While Police holds the recordings of "10/10" radio broadcasts, it would be unreasonably burdensome on Police to review the recordings on each radio channel over the period requested to compile the information necessary to form a satisfactory response. This part of your request is therefore refused pursuant to section 18(f) of the OIA as the information requested cannot be made available without substantial collation or research.

Per section 18A of the OIA, I have considered whether fixing a charge or extending the time limit would enable the request to be granted. I am of the opinion that neither would.

Per section 18B of the OIA, I have considered whether consulting with you would assist you to make the request in a form that would remove the reason for refusal. Again, I am of the opinion that this would not.

If you are not satisfied with my response, you have the right under section 28(3) of the OIA to make a complaint to the Ombudsman and seek an investigation and review of the refusal.

Yours sincerely

A handwritten signature in blue ink, appearing to read "M B Coulter".

Inspector Michael Coulter
Acting National Operations Manager
Emergency Communication Centres

Spreadsheet containing records of the 10/10 activations that were logged from an Officer Safety Alarm (OSA), through the Mobile Responder application on an officer's mobile, or from an officer's digital radio.
