

16 December 2021

AT to start construction work that will improve road safety for everyone

Kia ora,

Following consultation in March this year, Auckland Transport has engaged Fulton Hogan and Ventia to install speed-calming measures in Manurewa, starting January 2022.

It involves building a combination of speed humps, speed cushions, speed tables, zebra crossings, roundabouts, and intersection upgrades. The construction location is bound by Mahia Road, Great South Road and Weymouth Road, as shown on the map.

These improvements will create a slower and safer environment, which is safer for everyone.

What you need to know

Construction

- Starts January 2022 and will take approximately 6 months to complete – dependent on weather and Auckland's COVID restrictions
- Work will be done in stages and multiple roads may be worked on at the same time
- Day work hours are from 7am – 7pm. If night work is needed on your road, you will be notified
- You will receive a letter in the mail notifying you of roadworks on your road prior to construction
- Some temporary parking restrictions will apply - cones and no parking signs will be used to limit parking when needed
- Help keep our construction crew safe by slowing down around work sites, follow signages and be ready to stop

Access to your home

- You may experience detours and delays while work is taking place
- Driveway access may be restricted at times. You will be notified if driveway access is restricted for longer periods
- Traffic controllers will be onsite to assist drivers, pedestrians and cyclists. Pedestrian access will be maintained

The type and location of each safety measure is based on a variety of criteria. These include:

- Proximity to schools or other locations where there are a high number of people walking or on bikes
- International best practice guidelines for positioning measures to reduce speed in residential areas
- Space available between driveways and/or bus stops
- Whether roads are bus routes

What happens next

You will receive notification in the mail at least 48 hours before construction starts on your road.
