Subject: Springs on Cumberland Hill

Hi Stuart

Thanks for contacting us and bringing this to our attention. I was unaware that a spring had popped up under the bridge on the walkway.

We are currently working towards a solution in regards to the spring that is on the intersection of Heta/Cumberland, but in regards to the spring under the bridge I will be monitoring this on a fortnightly basis.

I have been to site yesterday and swept the area to reduce the risk of a slip or trip. I believe the spring over the coming months will stop but will monitor in the meantime.

Once again thank you for bring this to our attention.

Kind Regards,

Terry Wheeler
