

OIA RESPONSE 2024-103

DATE 11 June 2024

REQUEST All Notifications Relating to 1044 Coast Road

PARAMETERS From December 2022 – Present

KEY WORDS Earthworks, 1044 Coast Road, Development, Wainuiomata, Hutt City Council

NOTE All notifications have been copied across to this document exactly how they have been sent to the Environmental Protection inbox and logged by our Contact Centre.

Information pertaining to names of notifiers, their contact information and relevant addresses have been withheld under section 7(2)(a) of the Local Government Official Information's Act 1987.

Kia ora team

I have had a tip off from an angler about some river works on the Wainuiomata river at "Totara Downs" 1044 Coast Road, Wainuiomata. The property was recently purchased by Mr Mike Friday of Friday homes who allegedly has a consent to create a river crossing at the property.

I have attached a video of the work.

Are you able to have a look at this one, particularly the scope of works and property boundaries where the work has been undertaken.

Thanks and have a great week,

 | Senior Fish & Game Officer

Wellington Fish & Game Council

Details: GW email rcvd 15 April 23 @4.11pm Hi following up a call to the environmental hotline with this photo. High levels of sediment in the water at Baring head off coast Road Wainuiomata. Today 340pm - 15/04/23 Spoke to Park ranger [REDACTED] who advised she reported it last weekend to Environmental hotline [REDACTED] cleared up over the week. Suspect this is weekend work occurring on one of the properties just north of Baring head. No sign of sediment in water upstream at Wainuiomata township from either Moore's valley or black creek and although hard to tell it also didn't appear to be in the water to the north of baring head where the river is stoney and comes back near the road. If you can send someone out to check tomorrow that would be great as it's pretty bad (appears to be high levels of sediment). ***photo emailed to duty EHO*** Q> What is the Sink? Subject: Sediment in wainuiomata River

Hi following up a call to the environmental hotline with this photo.

High levels of sediment in the water at Baring head off coast Road Wainuiomata. Today 340pm - 15/04/23

Spoke to Park ranger [REDACTED] who advised she reported it last weekend to Environmental hotline but it had cleared up over the week.

Suspect this is weekend work occurring on one of the properties just north of Baring head.

No sign of sediment in water upstream at Wainuiomata township from either Moore's valley or black creek and although hard to tell it also didn't appear to be in the water to the north of baring head where the river is stoney and comes back near the road.

If you can send someone out to check tomorrow that would be great as it's pretty bad (appears to be high levels of sediment).

Cheers

Type: other Hiya. I'm writing to report a water quality issue on the Wainuiomata River. The address above is not my property. The landowner gave me permission to fish the river two weeks ago, which I have done in the past. I found the river full of mud and silt coming from the farm upstream. The caretaker told me that the property upstream recently changed hands and the new owner has been doing lots of earth works and putting sediment into the water regularly. Upstream of the neighbor's farm, the river was perfectly clear. I'm concerned about the impacts on riparian habitat and wanted to let you know. Details: NOTECC: logging as area is near Wainuiomata river that we maintain for flooding From: [REDACTED] Sent: Tuesday, 30 January 2024 2:13:18 pm

To: [@..](#) Subject: Fwd: Old pallet on beach bottom carpark Pallets Dump on Beach I am reporting that someone has dumped some pallets, on the beach side of the bottom carpark coast road beach. Can they be removed before they are set on fire. As a keen walker of the beach and road between the carparks I am finding that the area is being used more and more as a dumping ground. I tend to go down to the coast road twice a week to collect Rubbish on the beach and the 4 carparks. Q> What is the Sink? A> Q> What is the Affected Site?
