METSERVICE – MODELLED FORECAST FIELDS – RAIN

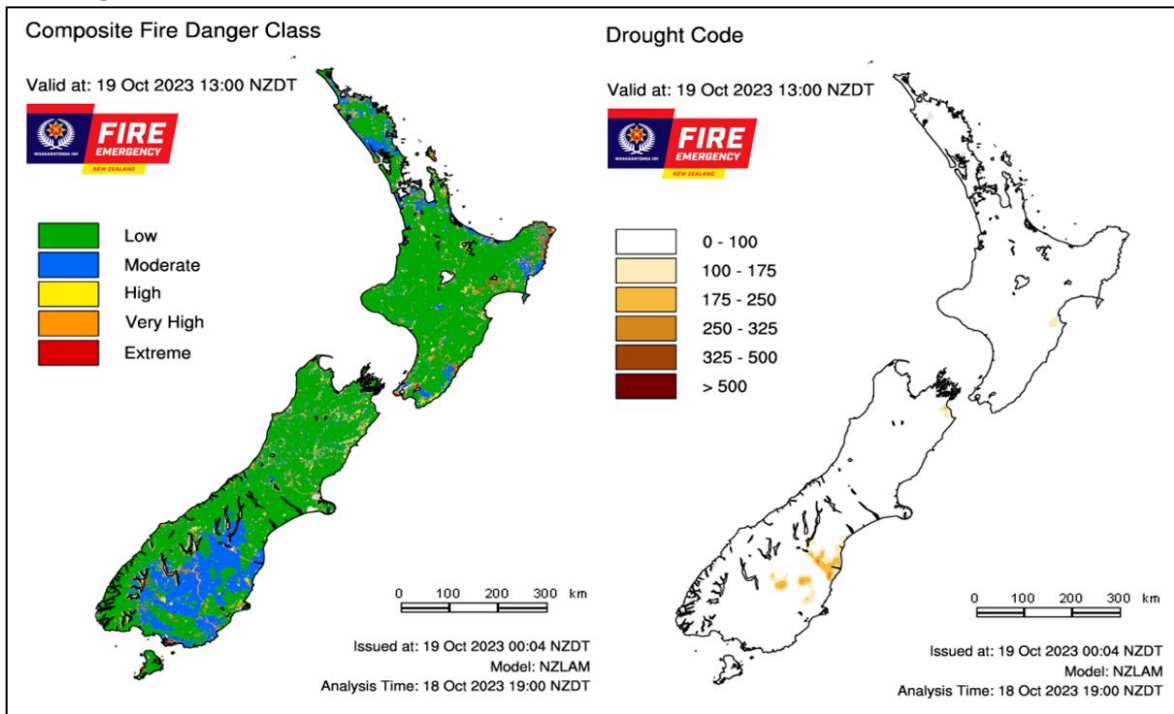

**Severe Weather Outlook**

A low in the north Tasman Sea is expected to move south eastwards past the north eastern North Island late Friday and Saturday, with an associated rain band affecting the northern North Island. A ridge of high pressure will predominate over central and southern New Zealand from Friday to Monday.

There is low confidence that rainfall amounts associated with the rain band could reach warning criteria about Northland on Friday and Saturday morning, and about Auckland, Great Barrier Island, Coromandel Peninsula and northern parts of western Bay of Plenty on Saturday.

**Fire and Drought Risk**

## Other Events

### New Zealand ShakeOut

At 0930hrs this morning our national earthquake drill and tsunami hīkoi (evacuation walk) took place with over 670,000 participants registered. ShakeOut takes place across the world to remind people of the right action to take during an earthquake - Drop, Cover and Hold. Participants are also encouraged to practice a tsunami hīkoi if they are in coastal areas to become familiar with their evacuation route.
