

Project information	
Project name	Auckland Domain - Wintergardens boiler renewal
Sentient ID#	31035
Programme name	PRG Regionwide Parks
Programme Sentient ID #	27050
Project complexity rating (PCAT)	
Author and date	Nina Quintana
Project budget requested and funding source(s)	\$100435.00
Estimated start and	31/Jan/2022
finish date	15/Mar/2023

## Strategic case (Case for change)

Introduction	
Background	Renewal of the Wintergardens boiler unit This project has originated via wider budgets Te Tahua Pūtea Tau 2021- 2031 (10-year Budget 2021-2031). General renewal budgets/development budgets. The Energy Efficiency and Sustainability Team within Community Facilities are currently exploring sustainable and more environmentally conscious replacement options. This boiler has been included in a wider project to ascertain and implement replacement options across Community Facilities assets. It is anticipated that delivery will begin in the third quarter of this financial year.
Opportunity/problem	[Give evidence-based facts (where possible) for the problem/opportunity to demonstrate baseline and impact it would have, i.e. current state, what problem is to be addressed and what would happen if we were to continue status quo? Future state what would happen if we progressed an opportunity to change?  For example, asset assessment report, local board LDI project, etc.]
Objectives	Reduced Council wide GHG emissions and reduce increased utility costs by phasing out gas use

Introduction						
High lovel benefits	Maintaining ourrent con ice	lovole				
High level benefits	Maintaining current service levels					
Alignment to strategy:						
Auckland Plan Outcom	es	Our Strategy Goals				
Belonging and participa	ation	Deliver within our means				
Climate Priorities		Māori Outcomes				
No specific priority focu	IS	No specific outcome focus areas				
	inkage in more detail here:					
The focus is on meetin	g Auckland Councils climate	action plan.				
Ol:	De des contractor					
Climate change	Reduce Greenhouse gas er	nissions				
(adaptation and						
mitigation):						
Māori outcomes and						
engagement						
Alignment to existing	The project is to be competed	with the seismic upgrade of the glass hosues				
programmes:	s p. sjest is to so sompetou	and colonial applicate of the glade flooded				
Constraints						
Constraints	In planning and delivering th	ne work, there are some general environmental				
		nts that require due considerations.				
	Some examples are:	nto triat roquire due consideratione.				
	•	the facilities, these will be closed to visitors for				
	the duration of the work	,				
	- Technology available to replace gas systems					
Dependencies	<u> </u>					
·	Typical dependencies are:					
	The program and works being undertaken as part of the seismic upgrade.					
Assumptions						
	- Consents are non-notified	• •				
	- Stakeholders are supportive					
	- Programme of works for the	ne project is manageable				
Health, safety and						
wellbeing	At Auckland Council we no	t the health and safety of our people and the				
Wellbellig		e empower everyone working across the				
		and speak out if they see unsafe work				
	practices.	and opean out it they see undate work				
	•	process, it is important to regularly monitor				
		sing iAuditor, to ensure that all the safety				
		and agreed to in meetings or written into				
	documentations are put in place and checked to operate effectively.					
		,				
	The list below describes spe	ecific activities or measures that are key to				
		environment for the delivery of this Asset Type.				
	5	, , , , ,				
	- Public open spaces are al	ways open to the public and should be treated				
	with care. Fields are fenced	off during works but sometimes it can be				
	•	eways and vehicle movements onto sites.				
	- Transportation is a high-ris	sk activity and contractors should provide				

	detailed Site-Specific Safety Plan (SSSP) plans showing where and when vehicles will access a site - Plant, excavators, tractors and implements pose additional risk unique to turf work. Only skilled operators should be contracted Hand tools (powered and non-powered). Even unpowered hand tools can cause injury. Use of both should be included in SSSP.
High level risks and	Example Covid 19 has resulted in work stoppages, increased costs, lack of
issues	resources and material shipment delays

# **Economic case (Determing value for money)**In Scope

Replacement of the gas boiler system with a wood palette burner system

### Out of scope

Seismic upgrade has been initiated as a stand alone project and is being completed. **Service change assessment** 

Service / process description	Proposed change & impact
Will this initiative cause a	
change to a service or process	Limited to the change in utility supplies
e.g. adding an additional	
service, changing or removing	
an existing service?	

### **Outline options analysis**

Option	Description
<option 1=""></option>	Like for like renewal – is not an option
<option 2=""></option>	System and technology which will deliver on GHG redcution
<option 3-5="" etc.=""></option>	

Description (click here for CBA worksheet)	Option 1: Do nothing	Option 2:	Option 3:	Option 4:	
Appraisal period (years)					
Implementation cost (\$000)					
Whole of life cost (\$000) (ongoing					
consequential opex, disposal cost, plus					
implementation cost)					
Cost Benefit analysis: The benefits are focused around=d the delivery of the Auckland Council climate plan and reduction of GHG.  Financial benefits and costs (excluding depreciation)					
i mancial benefits and costs (excluding dep	reciation)				
Net present value of benefits (\$000)					
Net present value of costs (whole of life) (\$000)					
Net present value (\$000)					
Non-financial benefits					
Benefit 1					

Benefit 2		
Benefit 3		

### Preferred option

The introduction of a system which uses a renewable energy source for heating, ie wood pallet burner

#### **Benefits tables**

### **Benefits and dis-benefits**

Category	Sub- category	Туре	Metric	Benefit statement	Benefit Description	Benefit Measure and Method	Source of data or cost centre/GL code	Baseline	Expecte d benefit and date(s)
Non- financial	Benefits to Communiti es	Maintaining level of service	Count/Nu mber	Maintaining current service levels					TOTAL
		AC Strategy	100 tones CO2e	GHG reduction	Meeting Council objectives	GHG emmsions reductions levels			100 tones CO2e
Benefit own	Benefit owner & Role Benefit Reporter								

<sup>\*</sup>Note: If there are additional benefits, add extra rows, with a Benefit owner signature line after each benefit.

### Non-quantifiable Benefits and additional information

Sustainability linked loans require emissions reductions targets to be met

## Commercial case (Procurement of preferred option)

## Detailing the procurement strategy

Market engagement focusing on suitable suppliers Liaison with the FFM for future operational matters, wood pallet deliveries and use

Risk Description	Mitigation	Date Idenfitied	Owner
Example Covid 19 has resulted in work stoppages, increased costs, lack of resources and material shipment delays	Covid 19- delay of supplies	18/11/2022	Nina Quintana
Issue Description	Resolution	Resolution Date	Owner

## Financial case (Affordability & funding)

### **Financial analysis**

Please complete the <u>financial</u> <u>analysis</u> spreadsheet and use the output to complete this table	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026-28	Total
Capital expenditure						
Operating expenditure						
Total expenditure						
Consequential operating expenditure						
Financial benefits (revenue/cost reduction)						
Net ongoing cost						

<sup>&</sup>lt;Please attach the financial analysis spreadsheet as an appendice.>

#### **Financial sources**

<Specifically, how is this initiative being funded i.e. is part of it from existing BAU? New or additional funding request or LTP allocated funds? Is there any other external party funding involved? Are other departments within council also contributing a portion from their own BAU budget?</p>

#### Contingency

<What contingency is included in the above costs. This is calculated by individual projects and is based on risk.>

## Management case

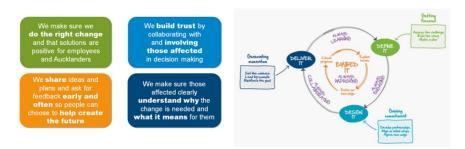

#### **Change Impact Assessment**

For scoring assessment guideline, please refer to "Change impact assessment matrix" in Kotahi </br>
If you scored 1 extreme or 2 High or 3 Medium, you'd need to engage a "Change Manager">

Impact Assessment	Impact
	(Low, Moderate, Medium, High, Extreme)
Size of the change	
Complexity of the change	
People increase/reduction change	
People – skills, training, new ways of working	
System change	
Process change	
Organisation structure change	
Culture change	

#### **Change management**

The <name of programme/project/nitiative> will follow <u>Auckland Councils Change Management</u> Framework.

The change management plan will need to be completed in the plan phase, if applicable.

#### Stakeholder engagement

Key stakeholders					
The following stakeholder group	s will be impacted by this change	in the following ways:			
Stakeholder name / group /	Evidence of collaboration / Agreed outcome				
contact	impact assessment				
Limited to no impact since the					
facility is undergoing seismic					
works					

The stakeholder engagement plan will need to be completed in the plan phase, if applicable.

### Outline project plan

Outline project plan				
How will this project be delivered, by who and when?				
Deliverable(s)	Delivered by Date due			
Design build Selected supplier				

#### **Health and safety**

This project is expected to < include / not include > design or modification of an existing asset, as such the requirements of Safety in Design will apply/not apply to this project.

There is legal responsibility on Auckland Council (as the 'Person Conducting a Business or Undertaking') to ensure, so far as is reasonably practicable, the health and safety of workers and other persons over the life of the asset.

The following health and safety related risks were identified in the option assessment relating to this project which will need to be considered for elimination or where not able to be eliminated to be minimised.

Option	Health and Safety Risk	Project Phase
	Risk associated with the removal and installation of the new system	

## **Approval and acceptance**

### Handover activities

The following activities and documents will be handed over once acceptance criteria have been met: <Designs, procedures, registers, maintenance manuals, templates, as built materials, post-project benefits monitoring and realisation activities, post project evaluation etc. (attach any relevant documentation to appendices)>

Governance sign off	Name	Signature to endorse	Date	Comment
I agree that the potential costs/benefits identified are realistic, and the low complexity delivery path reflects PCAT findings and approve and or endorse the project to continue for funding.				
reflects PCA1 findings	and approve and or	endorse the project to	continue for ful	naing.
Financial Manager /				
Commercial				
Manager				
Project sponsor	Martin Wong			
Business owner	Julie Pickering			

Danafit Owns		
Benefit Owner		
i Delielii Owilei		

SME endorsement <i>If</i> applicable	Name	Signature to endorse	Date	Comment
Eg.Change, legal, financial transactions, governance, communications etc				

Advisor/stakeholder endorsement	Name	Signature to endorse	Date	Comment
