

14 October 2024

Dear Eve

In response to your Official Information Act request sent on Monday 16 September seeking a copy of the last 5 years of students' late arrivals to school, along with identifying whether students had been late more than once and how often, please find our response below.

Please note our system records lates twice per day (morning and afternoon) this data includes both of these times, it is not easy to access schoolwide data for just morning lateness.

YEAR	% of students marked late at least once in the school year (am and pm)	% of student marked late more than once in the school year (am and pm)
2019	32.9%	15.8%
2020	60.9%	35.4%
2021	41.9%	30.5%
2022	56.4%	37.2%
2023	74%	59.5%

It is also not practical in our system to calculate justified late versus unjustified late.

Robyn Malcolm
