Subject: Joint Committee and FRIST Feedback

Hi all

Joint Committee

Good meeting yesterday with our WCEM Joint Committee.

[Redacted]

The Tsunami presentation was good and I have sent my appreciation and thanks to Sharon, Alice and John. One action from this item was to come back with a communication strategy - which Chair Madgwick wanted to see a greater mention of Tsunami. As I said at the meeting there is a lot we already do which I think is not as well understood. But there is probably the 'strategy' bit that we can definitely pump up.

[Redacted] will take a leading on this for us to develop something to take back to May Joint Committee. [Redacted] has also done some early work for us on this so we need to work with her as well. So expect [Redacted] to pick your brains on this in the next wee while.

Hi team,

The below link was in the DIB - its interesting to know where other Groups are with their community awareness around tsunami

[Kaikōura may have little warning of tsunami after an offshore quake](#)

Kaikōura may have little warning of tsunami after an offshore quake

The latest tsunami risk mapping shows that the K i k o r coast will possibly have very little warning, possibly just a few min te , if there' l r ge off hore q ke.

Underwater canyon seafloor study reveals landslide and tsunami risk

The risk of undersea landslides and their potential to cause tsunamis along New Zealand's east coast is being investigated by scientists aboard the German research vessel RV Sonne as part of a month-long international collaboration.
