

7 May 2026

Kevin Newlands

By E-mail Only: fyi-request-34376-d2d94865@requests.fyi.org.nz

Dear Kevin,

OFFICIAL INFORMATION REQUEST: GOODMAN-LEDGER PARK WW PUMP STATION

We refer to your official information request pertaining to the Goodman-Ledger Park Waste Water Pump Station which was formally transferred to us by the Ministry for the Environment on 15 April 2026. Our response is set out **below**:

1. Design and Capacity Original design capacity, intended population load, and current utilisation levels.

The current population served = 6,700. Equates to average dry weather flow of 2,471m³/day (28.6l/s). Design was to 120 L/s. Pumps are still limited to 120L/s each, but together they can peak at 150L/s.

Average Daily Volumes:

In standard wet weather conditions the pump station can usually manage about 9,700m³ in a 24-hour period. This equates to an average inflow to the pump station of about 400m³ per hour.

There are two pumps in duty/assist setup and are controlled by variable speed drives. At least one pump runs almost constantly throughout the day, speeding up or slowing down to maintain a target level in the wetwell. When flows increase, the second pump temporarily kicks in. This target level is about 25% of the wet well depth.

2. Performance and Failures Full history of faults, overflows, discharge events, and emergency responses.

3. Complaints and Community Reports All complaints received and actions taken by council.

In response to parts 2-3 The requested information is already publicly available on the

Tasman District Council

proactive releases page of our [website](#). To access it, please navigate to “Released LGOIMA responses” and select “Water and Wastes.” The information can be found within the proactively released LGOIMA responses titled ‘[Ledger - Goodman Wastewater Station faults, causes and locations for years 2025 to 23 February 2026](#)’ and ‘[Ledger - Goodman Avenue Stormwater and Sewerage Pump Health Complaints made between 2011 - 21 March 2026 - smell, health concerns, and water related issues](#)’.

As this information is reasonably available to you, your request is refused under section 17(d) of the Local Government Official Information and Meetings Act 1987.

4. Environmental Monitoring Air quality (including hydrogen sulfide), soil, and water testing data.

New Zealand does not have a National Environmental Standard for H₂S. Instead, councils rely on the [Ministry for the Environment \(MfE\) Ambient air quality guidelines](#), which are odour based, not health based.

MfE Ambient Air Quality Guideline for H₂S

1-hour average: 5 ppb

(≈ 7 µg/m³)

This guideline is explicitly based on preventing nuisance odour, not toxicity. There is no single enforceable public ambient limit.

Health effects of H₂S are effectivity controlled by WorkSafe and the 8-hour average is 5ppm or about 7mg/m³. This is 1,000 times higher than the ambient guideline.

The pump station at Ledger Goodman Park has been used for Temporary Air Quality Monitoring site for Particulate Matter and Nitrogen Dioxide.

Hourly and 24-Hour data for Particulate matter has been provided in the **enclosed** spreadsheet from the optical and reference instruments.

[AQ_Motueka_GoodmanLedgerPark_PM.xlsx](#)

A screening survey for nitrogen dioxide was also undertaken in 2025 and average results from the diffusion tubes are included in the spreadsheet.

E. coli sampling was undertaken at a number of private bores in the Ledger Avenue and Marion Place area in response to wastewater overflows following extreme rainfall events in June-July 2025. Other than this limited sampling, the Council has not located any additional information relating to public health risk assessments or system failure risks associated with this area or site.

5. Public Health and Risk Health risk assessments and system failure risks.

The Local Government Official Information and Meetings Act (LGOIMA) enables people to request official information from local government agencies, including the Tasman District Council. However, the LGOIMA only applies to information already held by the Council. The Council is not obligated to create information to respond to a request.

The information you are seeking in this case is not held by the Council but would need to be created to respond to your request. We are therefore refusing your request under section 17(g) of the LGOIMA because the Council does not hold public health, system failure or health risk assessments pertaining to the Goodman-Ledger Park Wastewater Pump Station.

6. Infrastructure Planning Maintenance history, upgrades, and future planning to 2054.

The following outlines general information relating to maintenance history, recent updates, and future planning.

Constructed:

The Goodman Park wastewater pump station was originally constructed in 1949. A major upgrade in 2004 saw reconfiguration of rising and gravity mains, new wetwells and pumps, new building, controls and generator.

Designed only as a wastewater pump station, never designed to take stormwater. Stormwater is a whole different network.

Work undertaken since installation

An odour filter was installed in 2019 in response to odour complaints. The odour filter is designed to treat wastewater odour emissions entering the unit through three stages, prior to emission to the atmosphere.

Regular Maintenance:

Odour filter – checked monthly. Replacement of filter media as required (generally between 18 – 24 months). We can monitor the H2S sensor on the outlet of the filter. Filter media has a 6-month shelf life, we order in as we need it, we do not have any in stock.

Wetwell – monthly cleaning. Water blasting to clean any buildup of fat or sludge. Clean floats and level control. Gravel build up checked 6 monthly and removed as required

Pumps – checked monthly, full mechanical check annually

Generator – run monthly and fuel refreshed quarterly

Valves – checked and exercised regularly

Electrical – full electrical check and calibration of alarms and sensors annually
Alarms are continuously monitored through our data communication system

Over the last year we have attended the Pump Station in response to:

- Rain events – potential and actual overflows
- Electrical issues – districtwide power outages, power surges
- Mechanical issues – broken connection/ faulty sensor
- Odour issues – have replaced the filter media, replaced perished rubber seals in manholes, made some changes within the wetwell to improve operation.

7. Financial Transparency Budget allocations and justification, including 9.9% rates increase.

The requested information is already publicly available on our website, as it is contained within the Annual Plan. The Annual Plan was open for public consultation up until 3 May 2026. This information can be accessed via the Shape Tasman website at [Annual Plan 2026–2027 | Shape Tasman](#). As the information is reasonably available to you, your request is refused under section 17(d) of the Local Government Official Information and Meetings Act 1987.

If you are unsatisfied with the Council's response, you have the right to seek an investigation and review by the Ombudsman. Information about how to make a complaint is available at www.ombudsman.parliament.nz or freephone 0800 802 602.

Yours sincerely
Legal Services Officer
