Dear Kay

I refer to your Official Information Act (the Act) request made to the Environmental Protection Authority ("EPA"). On 5 June 2026, the EPA transferred this part of your request to WorkSafe New Zealand:

*One. Where New Zealand is currently sourcing technical grade sodium fluoroacetate following the fire at Tull Chemical Company in Oxford Alabama in October 2024 and whether there have been any supply disruptions to the 1080 programme as a result?*

WorkSafe holds limited information on your specific query, but we can provide the following information which will give you some context.

Since October 2024, WorkSafe has approved only three requests for 1080 importation:

- (1) Sourced from Tull Chemical Company, Alabama. However, the quantity of 1080 importation from Tull was revised to reduce the quantity in the request.
- (2) Sourced from the JieJie Group Limited in China.
- (3) Sourced from Cambridge Isotope Laboratories Inc, United States of America.

To the extent that WorkSafe holds relevant information, this reply addresses the information you requested. You have the right to ask the Ombudsman to investigate and review my decision, and further information is available at [www.ombudsman.parliament.nz](http://www.ombudsman.parliament.nz).

To make information more freely available, we publish selected OIA responses (excluding personal details) on our website. Please get in touch with us if you have any questions about this.

If you require further assistance, please contact [ministerial.services@worksafe.govt.nz](mailto:ministerial.services@worksafe.govt.nz).

Yours sincerely

Chris Thornborough
