Subject: Radiation requirements

Good afternoon

In the rather broad category of "regulated goods" here I also have radiation (in my "glow in the dark" pile...).

In reviewing some proposals from MOH in respect of the radiation safety legislation today, it occurred to me that some of the items for space / high altitude may fall under the licensing requirements of this legislation. If this were to be the case, then there would be a regulatory process for the NZ company to go through, and there is a cost.

http://legislation.govt.nz/act/public/2016/0006/latest/DLM6339526.html?search=sw_096be8ed81293a8e_import_25_se&p=1&sr=1

above is a link to the NEW Radiation Safety Act (not in effect yet) so you can see some of the definitions.

[REDACTED] s 9(2)(a) of MOH [REDACTED] s 9(2)(a) is my contact for the operation of the current and future system, and may be worth a call. Could be useful for Rocket Lab to be aware of their obligations, should any of the items (including payloads) which they import require the licence. [REDACTED] s 9(2)(a) is based in Christchurch but is often in Wellington.

Regards

kirsty
