Hi [REDACTED] Yes we took down the business case that had the old unrounded numbers for each section on the summary sheets within it. That was after we got the request from Shane reti for bcr for each section.

It did get replaced with the A3 summary of the programme on the website. Shouldn't be any problem with updating the business case with the proper summary sheet and putting online.

What do they mean when they refer to the business case being pulled off the website. Have we taken information down that was previously there?
