**Cc:** Johnson Wu  
**Subject:** FW: Worksafe Notification- Attn: Dennis - non-disturbance notice follow up

**Categories:** S9(2)(a)

Hi Dennis

I phoned Johnathon Wu for advice then phoned S9(2)(a) back. I got his answerphone and left him a message stating that the non-disturbance was still in effect as the building was affected by asbestos and fire damage and that before anyone could enter the premises a number of things would need to happen i.e.

1. They would need permission of the Assessor, Accurate and following that
2. The only people who could enter the property were qualified asbestos contractors i.e. PDS (property decontamination services) and it is highly unlikely they would be able to arrange both of these things on a Sunday afternoon, so in short the answer is no.

I offered that he could phone me back if he had further information.

1427 S9(2)(a) did phone me back but I was driving so couldn't answer. I phone him back about 1449 but he did not answer and I did not leave a further message.

I would forward this file to Johnathon Wu as he is the author of the non-disturbance notice.

Thanks.

Susan

Did you speak to an H & S Rep: No

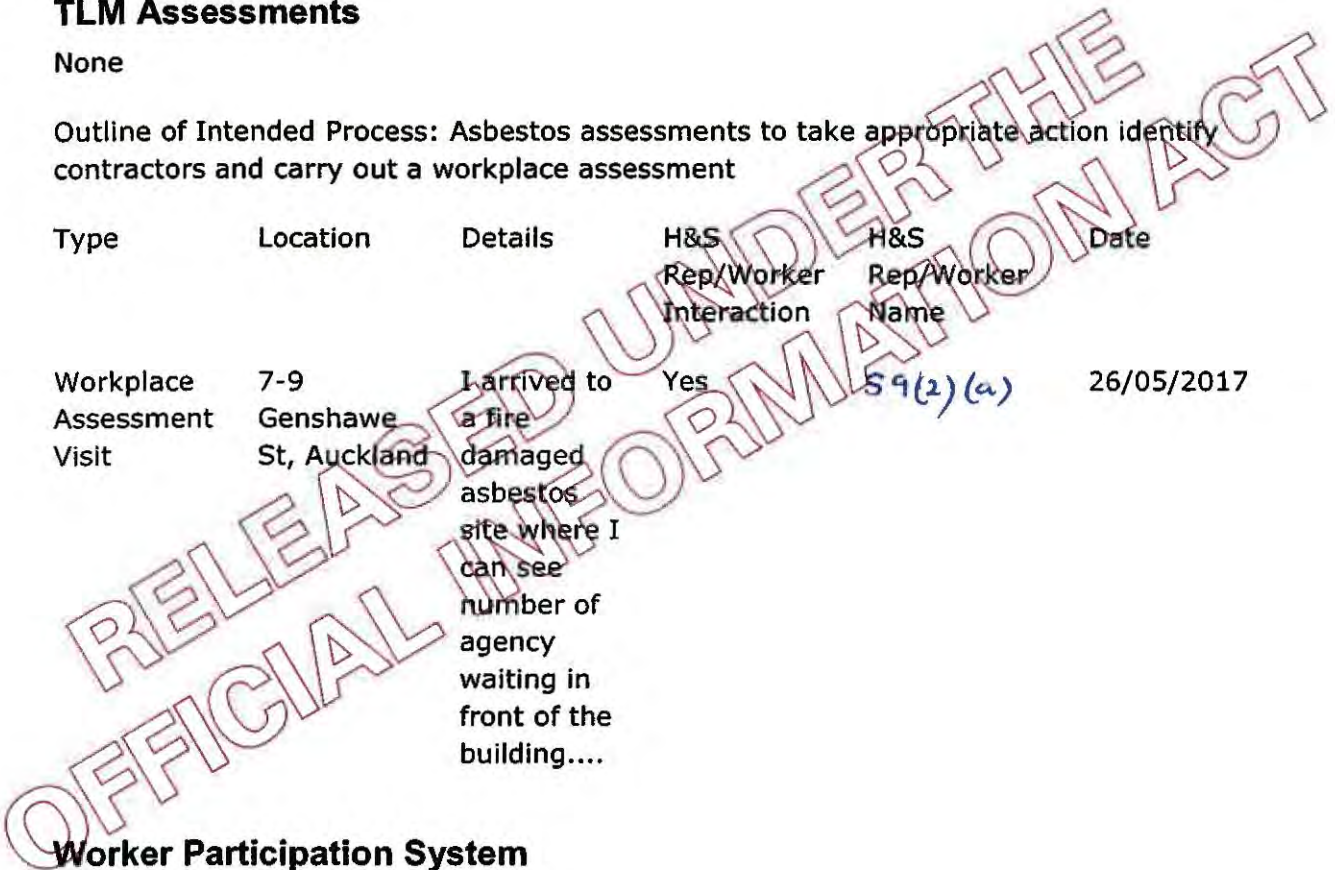

Reason for not speaking to an H & S Rep?: Not available

Did you speak to a Worker: Yes - add Rep. details

Type: Worker

Name: S 9(2)(a)

Matters raised/discussed: Air monitoring

5669783 - Stride Investment Management Limited - Assessment

## Findings

Detail of All Findings: I arrived at 7-9 Fanshawe St, Auckland and I met representatives of the Auckland City Council, Fire Investigator, Public Health, building manager, asbestos removal team, assessor and building workers.

I spoke to the Fire fighter and he indicated where the fire had started and damages caused on the 4th floor. It also appeared that on the 4th level asbestos removal work was taking place. Both front and side of the building had water constantly pouring out which I suspect to contain asbestos fibre.

Front entrance had tape across to stop any worker entering. Assessor

59(2)(a) from Accurate Consulting who was suiting up and was wearing full face mask about to enter the building. I spoke to and he informed me he was about to set air monitors for all levels in the building. ↑ 59(2)(a)

I informed all parties not to enter the building until Accurate gives clearance, however PDS (Removalist) and Fire Investigation may enter providing full PPE and RPE. Decontamination area may also be required.

I was unable to obtain clearance while I was there so I issued a non-disturbance notice for level 4 and upwards.

1/6/17

I issued a new non-disturbance for Level 4 only as Accurate Consulting has cleared the site apart from Level 4.

20/7/17

Received final review report and clearance from Accurste Consulting for all areas, L4 is back in removal process by PDS. Fire Investigation report received and result was undetermined.

Assessment Re-Visit Required: No

Health & Safety Issues Found: No Actionable Issues Identified

Hazard Management System: Hazard management system in place

Other focus area issues found: Construction > Secondary Focus Area > Company Risk Model (CRM), Construction > Secondary Focus Area > Company Risk Profile (CRP), Construction > Secondary Focus Area > Occ Health - Asbestos
